

## Considering Switching to a Heat Pump Water Heater? You Could Get up to a \$250 Rebate and Save on Your Monthly Electricity Bills!

Is your water heater more than 10 years old? With rebates up to \$250 from the HELPS Program, consider replacing your old water heater now, before it fails, with a modern heat pump water heater. In the process, you can save some green while helping to lower your carbon footprint.

For Ashburnham Municipal Light Plant customers, heat pump water heaters:

- produce 11x less CO<sub>2</sub> emissions than oil water heating
- have twice the product warranty
- are 4x less expensive to operate annually

### Heat Pump Water Heater (50 gallon tank)

#### Device Price

\$1,169

#### HELPS Rebate Amount

\$250

#### Yearly Operating Cost

\$130

#### Annual Carbon Emissions

382 lbs

#### Lifespan/Warranty

10 Years

#### Cost After 10 Years

\$2,218

#### Savings

\$4,877

### Oil Water Heating (32 gallon tank)

#### Device Price

\$1,275

#### HELPS Rebate Amount

N/A

#### Yearly Operating Cost

\$582

#### Annual Carbon Emissions

4,342 lbs

#### Lifespan/Warranty

5 Years

#### Cost After 10 Years

\$7,095

#### Savings

N/A

Rates were calculated based on a usage of 50 gallons of hot water per day.

Carbon emissions from heat pump water heaters come from non-renewable energy sources.
